The Importance of Being Earnest

August 2019

"The truth is rarely pure and never simple."

3 tales of very honest people.
Some have happy endings.
Some don't.
But all are amusing.

Salt Abridged
June 2019

Salt Abridged is a study guide designed in a way to induce laughter while helping students review all the most essential concepts in chemistry.

salt abridged

maybe ap chemistry won't be so bad
by some people who didn't have this awesome guide

Halite Tournaments

May 2018

Halite Tournament is a coding competition hosted by a Swedish, an American friend, and myself, which runs annually. Here are some of the designs I made for the tournament.

Project Banners

February 2019

These are some banners I made for my coding projects. Aura was my 2019 science fair, on detecting brain cancer using AI. TrafficSim was my 2018 science fair on finding the most optimal road formations. Stride ML was a machine learning project built at a hackathon with the intent of authentication via gait accelerometer data, so you can identify who's carrying a phone based on the walk.
